# Big Fat Christmas Quiz 2015

mtowns

Here is a quiz with several rounds: Christmas Dinner, Mr Men, Dingbats, Which sport? Which famous Harry? Which famous Building? Logos? etc. There is an answer grid for students to complete their answers.

Merry Christmas and please leave feedback.

gabceb commented 21 hours ago

+1

We should never leave the user with a dead page and instead use the original url if something goes wrong when pulling the template.

This change will also allow me to use the login/register stub on development (AKA local) on Blendspace because the template get will fail 😊

Follow original link if templateUrl doesnt work

# Widget Dependencies

The markup won't work if you don't have a couple of dependencies loaded in the page. (They are loaded by default in the tes.com masthead):

```
https://duqxiy1o2cbw6.cloudfront.net/tes/site-assets/1097/js/react-0.14_reactdom-0.14_alt-0.17.js
https://duqxiy1o2cbw6.cloudfront.net/tes/site-assets/1097/js/jquery-2.2.js
```

They are wrapped using `async-define` (<https://github.com/tes/async-define>), are isolated from the global namespace (they don't conflict with external versions of the same libs).

Also you need to be sure you have the css. The widget currently uses the "forms" and "modal" component (plus a grids and icons from bootstrap).

## Widget Markup

The widget requires this script:

```
<script async src="https://duqxiy1o2cbw6.cloudfront.net/tes/app-authentication/217/js/widget-loader.js"></script>
```

Here is the login link (opening the modal)

```
<a href="/authn/sign-in"
  data-load-modal-message="sign-in"
  data-load-modal-appid="authapp"
  data-load-modal="/api/authn-widget/widget-sign-in/markup?appName=tesconnect&modal=true&onsuccess=reload"
  data-load-modal-js="https://duqxiy1o2cbw6.cloudfront.net/tes/app-authentication/217/js/widget-authapp.js">
  Log in</a>
```
